- **The best weight to use:**

- The weight of a towel is measured by the GSM (Grams per Square Metre).
- Low GSM (300-400) towels are light and thin (for gym bag or beach use).
- Middle GSM (400-500) towels are good and comfortable hand feeling(for comfortable hotel/spa use).
- High GSM(550-650) towels are thick and fluffy(for luxury hotel use, like westin/hilton/W hotels, etc.).

Typically, the higher the GSM, the better performance you will have from the towel. Xinbailong supplies a wide range of towels including hand towels, bath towels, bath sheets with a GSM ranging between 400-650, you can choose and decide according to your budget.

3. What our clients say to our Satin Platium Bath Towels?

Cheap bathrobes custom bathrobe men's bathrobe for...

★★★★★

This is the first time to cooperate with Xinbailong, I'm so glad that found them in Alibaba supplies, they are fast responding to my request at first greeting, they acted proactively from consultation, tons call meetings for negotiation to help client to choose right products with nice price offer, also provide options for shipment service. etc. which made me most satisfied was they provide us custom logo in vary styles products within short time and airshipped to my hands for further confirmation in terms quality, color, specification. They are so flexible and confident in production, especially thanks to Sales Representative Joya & Manager Selina, without their great customer service & work by meet & discuss adequate to my local time zone, things will not work out beyond expectation. Strongly recommended and will definitely come back if reorder. Bravo 🍌
